EHS Manager 700 associates

- Ensure environmental, health, safety, Security and sustainability activities through implementation of policies and programs in a smaller location or a part of a larger plant or a specific functional specialization of a larger plant. Takes proactive measures to promote well-being of employees and communities where we work. Investigates and maintains records of all work related injuries and/or illnesses, for assigned location(s). Provides statistical analysis, and assists in the development of effective health and safety counter-measures to continuously improve safety standards. May perform activities at alternate locations as assigned by EHS Manager. Establishes measurable standards, conducts routine workplace safety inspections, as well as Security tours. Prepares reports for management and monitors results to ensure continuous improvement of safety standards. Coordinates EHS training, emergency preparedness, and practice drills to raise awareness, promote safety standards and ensure compliance. Performs regular environmental audits and efficiency testing, related to AIR, Energy, Water and Waste identifying opportunities and developing corrective actions in coordination with the plant managers and Regional Safety Manager. Identifies, prepares and monitors timely and accurate filing of government reports, permits, certifications and required correspondence. Ensure of ESG Energy, Fire systems, safety conditions, project manager help in new project for transference of US to Mx
